

WHEEL REFURBISHMENT & COLOUR CUSTOMISATION

THE MAG SPECIALIST Company Profile 2013

It is with great pride and pleasure that we introduce our business, TMS (The Mag Wheel Specialist) to you.

The Mag Wheel Specialist has just celebrated its 1st birthday and is steadily achieving its aim to become the preferred service provider to all clients as well as the public regarding wheel repair/refurbishment and customisation needs. TMS's world class standards regarding quality control, workmanship, safety / risk assessment, turn-around time and client service differentiates us from other companies in our industry.

Leading companies and brands such as BMW SA, Mercedes, Ferrari, Lamborghini, Porsche, Jaguar, Peugeot, VW, Land-Rover, Nissan and Santam are making use of TMS, benefitting from our high quality service and excellent workmanship. The new Nissan Juke 'Midnight Edition' and the Subaru 'Forester' recently launched having TMS powder coated rims as standard, both being extremely well received by both dealers and customers alike!!

WHEEL REFURBISHMENT & COLOUR CUSTOMISATION

Our Services and Products:

Customer Service

TMS prides itself on excellent customer service. We conduct our business with integrity, professionalism and reliability establishing long term customer relationships.

Powder Coating

We specialise in the refurbishment and customising of alloy or steel rims using Powder Coating techniques adopted from European methods, mastered by our highly experienced technicians and brought to South Africa to ensure a top quality product. Our unique powder coating process is adapted to ensure maximum bonding to the metal or alloy surface with a wide range of more than 3000 colours, with properties that are more UV and scratch resistant - especially in our local African conditions.

With our Powder coating we offer the following services:

- A quick ONE-DAY service on standard finishes / OEM colours
- A 12 month warranty
- Full customisation options
- Please note - we also do sandblasting and powder coating on any metal components or vehicle accessories e.g. roof racks, bull bars, jerry cans, jacks, toolkits, motorcycle frames, etc.

Complete Paint Re-spray (Cosmetic touch-up)

We also offer a complete paint re-spray or wheel cosmetic 'Touch-up' service to those customers not looking for a full refurbishment. A wide range of colours are available and can match any OEM silvers.

Turn-around time

We pride ourselves on our market-leading quick turn-around time and offer six categories of elite high end finishes, ranging from standard Classic to our Signature Series. Standard finishes, such as matching OEM silvers, are completed as a ONE DAY SERVICE. Personal customization such as our Image and Signature Series, takes approximately two days.

TMS Collection & Delivery Service

We have dedicated vehicles on the road with geographically planned routes to ensure that all of our promises regarding collection and deliveries on-time to our clients are met.

WHEEL REFURBISHMENT & COLOUR CUSTOMISATION

TMS Crack Detection

To ensure the safety of our clients, we have a sophisticated UV crack detection system to detect any defects or cracks in a wheel - this system is more widely known in the international aircraft industry as it is used to do crack detection on turbine engines.

Repair Services

- Rim straightening
- Tig welding
- Wheel fitting and balancing
- Wheel polishing
- Leak testing

RCS Payment Facility

RCS personal loan application and facilities are available at TMS. For further information, please go to www.rcs.co.za

Workshop Policy

Our workshop is under the direct supervision of Mr Will Prozesky, who trained and worked in the United Kingdom for 8 years. He is considered a master in his trade, meticulous about attention to detail and drive for perfection. Will's team of technicians take immense pride in the work they produce and are totally committed to presenting the customer with a high end market product.

Product knowledge and training

Our marketing team has many years of experience and an intimate knowledge of the process and procedures necessary to refurbish or customize a wheel. They will ensure if required, that your sales team is fully prepared for any questions that may be presented to them by your customers. An 'in depth tour' through our workshop will give the sales team a full grasp on various stages of the refurbishment process. Our training will cover the following:

- Wheel inspection and crack detection
- Wheel preparation
- Spraying and 'baking'
- Finishes available
- The advantages of powder-coating

Thank you for the opportunity to introduce ourselves to you.

Please visit our website www.sa-tms.co.za and The Mag Specialist on Facebook page for much more information.

Best Regards,

Jerry Ascough
